

RELEASE

ASPHALT RELEASE AGENT

Release is a thick, concentrated release agent specifically designed to prevent polymer and traditional asphalt mixes from sticking to truck beds, equipment and tools.

This release agent contains a special blend of polymers and detergents that will not allow asphalt to stick even to rough truck beds. It is heat activated and should be sprayed before loading occurs. It works great on conveyor chains and tools as well.

Release is a biodegradable, non-hazardous and water-soluble chemical—making it a safe and cost-effective solution.

DIRECTIONS

Spray using an air pump system, hand-held sprayer, or through an automatic drive-through sprayer. Suggested dilution ratio is 1:4 to 1:20.

TECHNICAL DATA

Form	Liquid
Fragrance	None
Color	Blue
Wetting Ability	Excellent
Cold Stability	32°F
Flashpoint	> 230°F
Solubility in Water	Complete
pH	11.0 - 12.0
Weight per Gallon	9.0 lbs/gal
Specific Gravity	1.08
Storage Stability	1 year
Biodegradability	Complete

ADDITIONAL INFORMATION

This is an industrial product. See label for proper personal protection. Consult SDS for more information. This is not a consumable product. Keep out of reach of children. Keep container closed when not in use. Store in a cool, dry place. Do not allow product to freeze. If freezing occurs, stir gently to reconstitute. Dispose of container in accordance with all federal, state and local regulations. Read label for general warnings, cautions and usage information.
