

COMPLETE HD CONCENTRATE

TRUCK AND EQUIPMENT DEGREASER, CLEANER AND WASH

Complete HD Concentrate is an aggressive pressure washer detergent specifically designed to degrease, wash and clean heavy equipment, over-the-road trucks and trailers. This product will remove heavy grease, oil and grime from heavy equipment. It will also remove heavy road film, exhaust soot, grease, oil and grime from trucks and trailers without harming the paint. Complete performs well in soft or hard water. This product will completely clean painted surfaces without brushing and will leave the paint film-free and shiny.

DIRECTIONS

Complete is designed to be used with a hot water high-pressure washer. Complete will work great with a cold water high-pressure washer when dispensed with a down stream injector. Cold water high-pressure washing is only suitable when washing trucks, trailers, etc. For best results, always use hot water high-pressure. For presoak: dilute Complete 1:1. For fleet and equipment washing: put chemical tube in Complete concentrate and set to deliver approximately 3 oz. to 6 oz. of Complete per gallon of water discharged.

TECHNICAL DATA

Form	Liquid
Odor	Mild
Color	Brown
Wetting Ability	Excellent
Detergency	Excellent
Foaming	Medium to high
Cold Stability	32°F
Flashpoint	None
Solubility in Water	Complete
pH	10.5 - 11.5
Weight per Gallon	8.85 lbs
Specific Gravity	1.06
Storage Stability	1 year
Biodegradability	Complete

See SDS for complete data.
