AREAS OF USE:

Trucking
Automotive Industry
Tires
Vinyl
Mats
Rubber Molding
Engines

BENEFITS AND FEATURES:

Heavy silicone base
Fresh Fragrance
Wet-like shine
Durable shine that holds up after multiple washes

TECHNICAL DATA

Form	Liquid
Odor	Fresh
Color	Royal blue
Foaming	Medium to high
Cold Stability	35°F
Corrosion Factor	None
Flashpoint	200°F
Solubility in Water	None
Weight per Gallon	8 lbs 4 oz
Specific Gravity	1.06
Storage Stability	1.5 years
Biodegradability	Complete

See SDS for complete data.

DIRECTIONS

Clean faded surfaces well before applying Renew. Mist Renew on surface and use a clean cloth to rub product in. Mist another thin layer, being careful not to over spray. For a very high-gloss shine, do not rub in this second application. For a soft, semi-gloss shine, lightly wipe the treated surface.

To treat new or non-faded rubber, mist once evenly and allow product to dry. Wipe lightly if a soft semi-gloss shine is desired.

To restore vinyl trim, plastic, bumpers and rubber molding, clean surface well, mist dressing on, and use a clean cloth to wipe dry. Lightly wipe excess off vinyl to reveal a deep, rich shine.
